I. Description of My Slam Book

One of the best things in life is having a slam book. This slam book contains information about me in different aspects of life. This slam book has six individual tabs: About Me tab, My Family tab, Fun facts tab, About Life tab, Academics tab, and Memories tab. First, the About Me tab is also about my personal or primary information. Secondly, the My family tab shows the details of my family members. Next is the Fun facts tab, which contains random questions about different sub-topics. Fourth, the About Life shows information about how's my life going and my relationship with people. Next, the Academics tab contains information about the status of my school life. Lastly, the Memories tab that contains unforgettable pictures.

Moreover, the theme I used in this website is related to scrapbook designs, which is my favorite. With that theme, I used different shades of brown, which I think are soft in our eyes and complemented with the theme.

IV.   Takeaways

First of all, I want to say thank you to our Prof in CET 5, Professor Orioque, for giving us experience again in answering slam book even we are not teenagers anymore. This is not just an activity in html for requirements, but also knowing who you are, knowing what you are doing now and giving you some lookbacks in your life. With that, this activity is not only for academic requirements but also for our mental health. On the other hand, this activity taught me how to be organized and be patient in creating and designing this website, which I can apply in my everyday life. Also, it taught me to be more creative. All in all, I had a great time and enjoyed in doing this activity <3
